

ANTOINE DAUTRY

FULLSTACK DEVELOPPER

FREELANCE

PROFIL

Hi there! I'm a passionate Fullstack Web Developer with 4+ years of experience. While I enjoy front-end work, my skills span both front-end and back-end, including technologies like PHP, JavaScript, and Java. Beyond being a job, web development is a hobby that drives my creativity and commitment to crafting exceptional digital solutions.

TECHNOLOGIES

Frameworks : Angular, Spring boot, Symfony

Databases : MySQL, PostgreSQL, MongoDB

Softwares : IntelliJ IDEA, PHP Storm, JIRA

CI/CD : Openshift, Gitlab CI, Jenkins

Spanish: Professionnal

PERSONALS PROJECTS

RESUME TO PDF

Aug 2023 - Now

🔗 <https://my-resume.adautry.fr/show-latest>

In order to simplify my life, I decided to create a site that would allow me to manage my CV more easily. Now I have a form... and that's it. From the form I can generate my CV in PDF format using an external API <https://pspdfkit.com/>. The PDF CV is stored on the server and is delivered if the user goes to one of the following urls <https://my-resume.adautry.fr/show-latest> or <https://my-resume.adautry.fr/download-latest>.

TWIG

RESUME TERMINAL

Nov 2021 - Now

🔗 <https://resume.adautry.fr/>

I had the idea of creating a CV in the form of commands entered on a terminal. The list of commands and expected responses are contained in a JSON file, making this project easily adaptable. The code is opensource under the MIT license and is available here: <https://github.com/antoine1003/resume-terminal>.

SCSS

PHP

CHARTSFINDER - WEB

Apr 2021 - Now

🔗 <https://chartsfinder.adautry.fr/>

Webapp in Angular 11 for searching and displaying aeronautical charts. A PHP CRON runs every night, checking for updates. If so, the script will scrape the data and then format it as JSON, a file that will then be returned by the API.
